

# REDWAN HUSSAIN

Software Engineer

GitHub : [github.com/redwan-edu](https://github.com/redwan-edu)

LinkedIn : [linkedin.com/redwan-hussain-edu](https://linkedin.com/redwan-hussain-edu)

S. Scholar : [semanticscholar.org/Redwan-Hussain](https://semanticscholar.org/Redwan-Hussain)

Phone : +880 1775 491560

Email : [redwanhussain.edu@gmail.com](mailto:redwanhussain.edu@gmail.com)

Address : Majortila, Sylhet-3100, Bangladesh

Gender: Male — DOB: 05/01/2003

Nationality: Bangladeshi

## PUBLICATIONS

- **Toward Generalized Detection of Synthetic Media: Limitations, Challenges, and the Path to Multimodal Solutions::** Published in TCCE 2025 (Springer Nature), UTeM, Malaysia.
- **GenDet-M: A Multimodal Ensemble Architecture for Detecting High-Fidelity Synthetic Videos::** Submitted to Neural Computing and Applications (Q1 Journal), United Kingdom.
- **Heart Disease Prediction Using Machine Learning with Ensemble Feature Selection and Hybrid Resampling Technique::** ICEFronT: International Conference on Engineering and Frontier Technologies 2026 (ACM Publications)

## EDUCATION

- **Leading University** Sylhet, Bangladesh  
*Bachelor of Science in Computer Science and Engineering* Feb. 2022 – Apr. 2026
  - Core coursework focused on Software Engineering, Database Management Systems, Artificial Intelligence, Machine Learning and Computer Vision.
- **Scholarshome** Sylhet, Bangladesh  
*Higher Secondary Education* Jan. 2019 – Dec. 2021

## EXPERIENCE

- **Doddle Software Limited** Southampton, United Kingdom  
*Project Manager* Feb. 2025 – Present
  - **Agile Leadership:** Managing the complete software development lifecycle using Agile Scrum methodologies.
  - **Spec-Driven Development:** Introduced Spec-Driven Development to minimize AI hallucinations, development time and significantly reduce API costs in software development.
  - **Risk Management:** Identify technical bottlenecks early and proactively mitigate project risks to ensure timely delivery.
  - **Team Leadership:** Allocate engineering resources, manage developer workloads and coordinate successful software releases.

## PROJECTS

- **Manifest:** Developed an Agentic AI-powered task management platform for solopreneurs.
- **SuperMock:** Built a SaaS IELTS mock testing platform for training centers supporting unlimited students, custom question generation and cloud deployment.
- **Omplay:** An Agentic Research Assistant that does not hallucinate. It tells you what to cite and when.
- **Anyscribe:** An Agentic Niche finder that helps you write an E-Book for verified market.
- **Clubmate:** Developed a secure Android application with end-to-end encrypted messaging for comprehensive club management.

## PROGRAMMING SKILLS

- **Languages:** C, C++, Java, Kotlin, TypeScript
- **Technologies:** React, Next.js, Jetpack Compose, PostgreSQL, Supabase, Firebase, Convex, Tailwind CSS 4

## SKILLS

- Software Engineering, Full Stack Development, Spec-Driven Agentic Development, Database Management Systems, AI Agent Integration, MCP Servers, Prompt Engineering
